

## THE CHAIR-LIFT

For the simple pleasure of a long soak in your existing bathtub, take a look at the Chair-Lift. This battery powered lift will lower you to the bottom of your tub and then raise you back to the top, without having to strain knees, hips or shoulders. Imagine the confidence of knowing you can safely get in and out of your tub with out the worry of slipping or falling. Reclining allows you to shampoo without getting soap in your eyes, or to lie back to enjoy the effects of the warm water.

The large folding side panels open to rest on the edges of your bath, creating a generous transfer area. The stainless steel frame can safely support bathers up to 297 lbs.

The lift lowers to 2.9" from the bottom of the tub, then the back support reclines 35 degrees. To return to the top, the back comes to the upright position and then the lift rises to the top of the tub.

The Chair-Lift operates with a push button hand control. An intelligent safety system checks the power levels before every use. The control will not allow you to lower your bath lift unless there is sufficient power to raise it again. An illuminated symbol will remind you when it's time to recharge the hand control.

The Bath-Lift folds for easy storage when not in use or for traveling.

- Total height including backrest: 39"
- Backrest height: 23"
- Backrest width: 13"
- Seat height maximum: 16.1"
- Seat height minimum (lowered): 2.9"
- Seat width excluding side panels: 15.4"
